Powder Coated Baked Enamel Color Selector

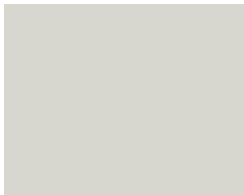

For satisfactory results, select a color that coordinates well with the wall color.

Sharp contrasting colors may make a smaller room look crowded. To help lessen their institutional appearance, health care facilities are currently using updated refreshing colors for a welcomed change. While every effort to furnish an identical reproduction of your selected color will be made, allowance for certain uncontrollable factors in the baking process and the paint manufacturers shade tolerance must be considered.

***HIGH-GLOSS BLACK & WHITE AVAILABLE AT NO EXTRA CHARGE.**

SLIGHT BATCH TO BATCH COLOR VARIATIONS MAY OCCUR

#84 Burgundy

#60 Strata Gray

#57 Bahama Blue

PROTECTION & APPEARANCE ARE THE REQUISITES FOR A GOOD FINISH

Toilet Partitions subject to frequent washing and cleaning as well as various acid conditions, require better than usual protection. Through continuous tests and research we have, with the cooperation of our paint manufacturer, developed a baked-on powder coated finish which strongly resists these conditions. In addition to this superior grade

material, we exclusively use chem treat dry galvaneeded A60 steel. The added zinc iron alloy creates a thicker coating of protection during manufacturing and an excellent adhesion of the powder coat finish. The same rigidly tested high quality finished steel is used on all our other products.

Following the most current color trends, we have selected our standard colors utilizing a variety of modern shades that can coordinate with any surrounding color schemes.
